About me

Hi, I am Mariyana, and I am a 21-year-old student from Sofia, Bulgaria. I moved to the Netherlands to pursue a degree in ICT and Media Design.

Why ICT?

My mother signed me up in one of the best software academies in the country in fifth grade after noticing my strong interest in computers. I continued to attend those classes until seventh grade when it came time to choose a high school. I applied to a prestigious school with foreign languages, mathematics, and informatics because I was still interested in programming. Five years later, I pursued my ICT studies at Fontys University of Applied Sciences.

Hobbies

Along with my education, I was taking Taekwondo classes where I developed my skills in this art to a very high level. I was also a member of a dance crew, with whom I was able to participate in a variety of events and competitions.
